Hardy English Chrysanthemums

NEXT YEAR'S PRICES NOW!

One-Year-Old Stock Plant at Only Half the Price of a Rooted Cutting Last Spring

We have all of our own propagation stock needs flated up and we are ready to give you a real bargain on our surplus. Since we also buy many new varieties each year, we know that these prices are really unheardof bargains. But since this surplus is beyond our own needs, we are passing on these wonderful bargains to you.

You can buy these stock plants now and propagate over winter as we do and you will have several nice rooted cuttings from each stock plant. Many of the varieties on List No. 2 are so new that we are the only growers in the United States that are listing them. If you buy now and propagate, you will have lots of nice plants ready for your retail trade in the Spring.

If you do not grow these hardy English Chrysanthemums for your retail trade you are missing something. Although we send out a retail catalogue listing many items, our Chrysanthemum sales exceed all other sales combined. So be sure to give them a try.

This will be the last stock plant list that we are sending out this season. These prices will hold good as long as we have surplus stock. We will be able to fill your order as soon as we receive it and would rather not have to hold orders for later shipment as that means extra work. Our surplus is not large on many varieties, so send your order in early. May we substitute if out of any varieties? Or better still, mention a few second choice varieties in case we are out of a variety. This list contains many varieties not offered on our earlier stock plant list. If you ordered from our earlier list, this is an opportunity to make added savings on these **CLEANUP SURPLUS PRICES**.

List No. 1

List No. 2

Stock Plants in This List 50c Each — 6 of One Variety \$2.50

The following list of Chrysanthemums are the Early English Chrysanthemums that we have imported from England and Canada the last two years. With the cost of the plants, duty, transportation and plant losses the plants always cost us well over \$1.00 each. However, we have had very good luck with our propagation of Chrysanthemums and we have a surplus of the following varieties.

- | | |
|---|---|
| <p>AUGUST GLORY. Golden bronze incurve.
